ABOUT ME

- Video production is all about telling stories, The visual arts are powerful and if you manage to hook an audience, the world is at your feet. That is why I do what I do, to be apart of something that makes an impact. The merging of digital and practical artistic techniques fascinates me immensely and I find myself quite often wearing many hats. I believe it is important to pursue things that give us joy and this highly visual form of storytelling, is one of those things for me.
